

## OX2 applies for a Natura 2000 permit for a wind farm outside Skåne

**OX2 has applied for a Natura 2000-permit for an offshore wind farm within the Swedish Exclusive Economic Zone off the coast of Skåne.**

The wind farm is called Triton and is located about 30 km south of Ystad. The offshore wind farm comprises up to 129 turbines with a maximum height of 370 meters.

OX2's permit application, which includes an environmental impact assessment, EIA, is handled by the County Administrative Board of Skåne.

The capacity of the wind farm is about 1 800 MW, and the estimated electricity production amounts to approximately 7.5 TWh per year, which corresponds to the production from a nuclear power reactor or an annual household electricity consumption of 1.5 million households. The project corresponds to reduced carbon dioxide emissions of approximately 4.5 million tonnes per year.

“This is the third application we have submitted in a short time regarding offshore wind power. The Triton wind farm would add renewable electricity to southern Sweden and ensure continued secured energy supply to the region and also contribute to achieving Sweden’s environmental goals”, says Hillevi Priscar, Country Manager OX2 Sweden.

The project is part of OX2's Swedish project development portfolio, which at the end of the third quarter amounted to 11.3 GW.

OX2 has previously applied for a Natura 2000 permit for the Galatea-Galene wind farm off the coast of Halland, as well as a permit to establish the wind farm under the Act on Sweden's Exclusive Economic Zone.

## About OX2 AB (publ)

---

### About OX2 AB (publ)

OX2 develops and sells wind farms and solar parks. Since being founded in 2004, OX2 has taken a leading position in the area of large-scale onshore wind power, having developed and sold around 2.5 GW in Sweden, Finland, Norway and Poland and to customers such as Allianz, Ardian and IKEA. During the period 2014-2020, OX2 established more onshore wind power in Europe than any other developer. By constantly increasing the availability of renewable energy, OX2 is driving the transition to a more sustainable future. Based in Stockholm, Sweden, OX2 runs operations in Sweden, Finland, France, Italy, Lithuania, Norway, Poland, Romania, and Spain. Net sales in 2020 amounted to SEK 5,201 million, with EBIT of SEK 416 million. OX2 is listed on the Nasdaq First North Premier Growth Market.
